Overview:

Participants will learn the steps to be followed to duly plan and perform a case of zygomatic implants and successfully treat patients suffering from the severely atrophic jaw.

During the Hands-On session, participants will work on a real case 3d model. Under the monitoring of tutors, they will perform the step-by-step drilling protocol until the implant insertion.

The course will include a LIVE SURGERY demonstration.

Course Format:

- Overview of surgical anatomy.
- Introduction of Zygomatic Implants.
- Planning and hands on for placement of zygomatic implants on 3-D models.
- Live surgery demonstration.
